# ABOUT US

## Here To Help You Impress

At Intulux Lighting, we pride ourselves in finding the correct luminaire solution for your application, enabling you to impress your clients. We go the extra mile to ensure design superiority, making your offer the most attractive proposition for your customers whilst ensuring compliance with all building regulations.

Our ethos is simple: "Project Before Product". We believe that understanding the unique needs of your project comes first, guiding every decision to deliver solutions that not only meet but exceed your expectations.

### Customer-Centricity

We pride ourselves on creating tailored luminaire solutions that exceed our customer's expectations.

### Collaboration

We work closely with clients, designers, and industry experts to ensure that our solutions are aligned with each project's unique goals.

### Excellence in Service

We go the extra mile in every aspect of our business, from initial consultation to project completion, ensuring that our clients receive a first-class experience.

### Compliance and Integrity

We are committed to upholding all building regulations and industry standards, ensuring every lighting solution is fully compliant.

**Proud of  
50 Years,  
LED by  
Design,  
Expertise &  
Compliance**

Half a century of delivering the latest and most energy-efficient lighting technology through thoughtful design and strict compliance with industry standards.

# PROJECT BEFORE PRODUCT

We believe that every project is unique, and every application deserves a lighting solution designed to highlight its distinct features. That's why we focus on understanding the full scope of your project first, ensuring we select the right products to meet its specific needs, rather than fitting a one-size-fits-all product to a space.

“WE FOCUS ON THE APPLICATION,  
NOT JUST THE PRODUCT”

## Understanding Your Vision

Before we recommend any products, we take the time to truly understand your project. From the architectural layout to the atmosphere you wish to create, every detail matters. By listening closely to your goals and challenges, we ensure that the final lighting solution is not only functional but adds a distinctive, professional touch to the space.

## Bespoke Service

No two projects are the same. That's why our approach is built around creating bespoke lighting solutions that are customised to enhance the character of your space. Whether it's a commercial project, a retail space, or a unique design, we prioritise the application and the specific requirements before suggesting any product. Our goal is always to make your lighting an integral part of the design, not just an afterthought.

## The Right Product

Once we have a clear understanding of your project, we work with you to choose the right products that fit seamlessly into your design. We don't just sell lighting, we provide solutions that make your spaces shine in the best light, both literally and figuratively.

## Collaboration: The Secret Weapon

At Intulux Lighting, we see our clients as partners. We collaborate with architects, interior designers, and project managers to ensure that the lighting solutions we provide are not only functional but are a perfect fit for the design and goals of your space. By prioritising collaboration, we guarantee that the final product is a reflection of your vision—executed flawlessly.

# THE IMPORTANCE OF LIGHTING DESIGN

In the industry, it's common to over-specify, but we believe great lighting design is about efficiency and performance, not just aesthetics. By carefully selecting the right fittings and photometric performance, we achieve optimal light levels with fewer fixtures, reducing installation and maintenance costs. Our approach ensures you provide the most cost-effective solution without compromising on quality and compliance.

**Expert Lighting Design**  
We deliver a comprehensive plan, complete with 3D visuals, to guide the design process from concept to installation, all while ensuring full compliance.

## ⚙️ Optimised Design over Product

Our lighting designers are not constrained by a catalogue. Intulux works with industry-leading optic manufacturers to deliver every lumen on target every time.

## ⚙️ Design Beyond Today

We design to encompass the future, ensuring compliance with up-coming legislation, and long-term energy savings.

## ⚙️ Freeing Up Budget with Design

Thoughtful design reduces fittings, freeing up budget for other key areas, ensuring the client's vision is realised without compromise.

## ⚙️ Efficient Design Leads to Results

Our lighting design is data-driven, always seeking to improve upon a proposal – and demonstrate quantifiable gains.

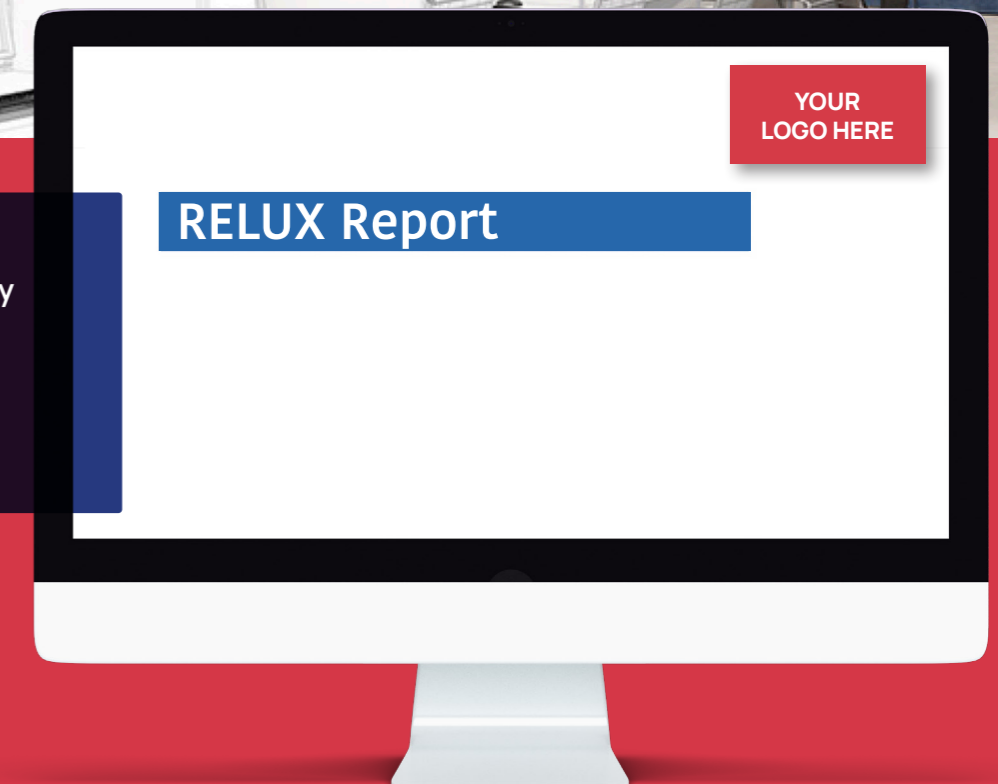

Give us a call to find out how we make lighting design your success.

## IMPRESS YOUR CLIENTS THROUGH BRANDED DESIGNS

Our mission is to deliver the perfect luminaire solution for your application, helping you impress your clients every time.

To achieve this, we offer a wide range of services designed to make your projects stand out. We specialise in creating branded lighting designs that provide a more personalised experience, allowing you to offer unique, tailored solutions that truly resonate with your clients.

Let us take a step back by adding your logo to the design, helping you to elevate your brand!

# PROJECT CASE STUDIES

## East Midlands Parkway Rail Station

Intulux were asked by East Midlands Railways to provide a solution to save energy. The company is now saving over £1000 per year!

## 90 Chancery Lane

LONDON

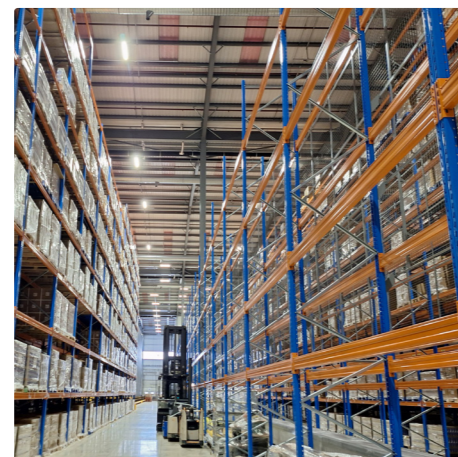

Just off London's iconic Fleet Street, Intulux was asked to provide the lighting for the refit of 90 Chancery Lane.

## Minster Court

LONDON

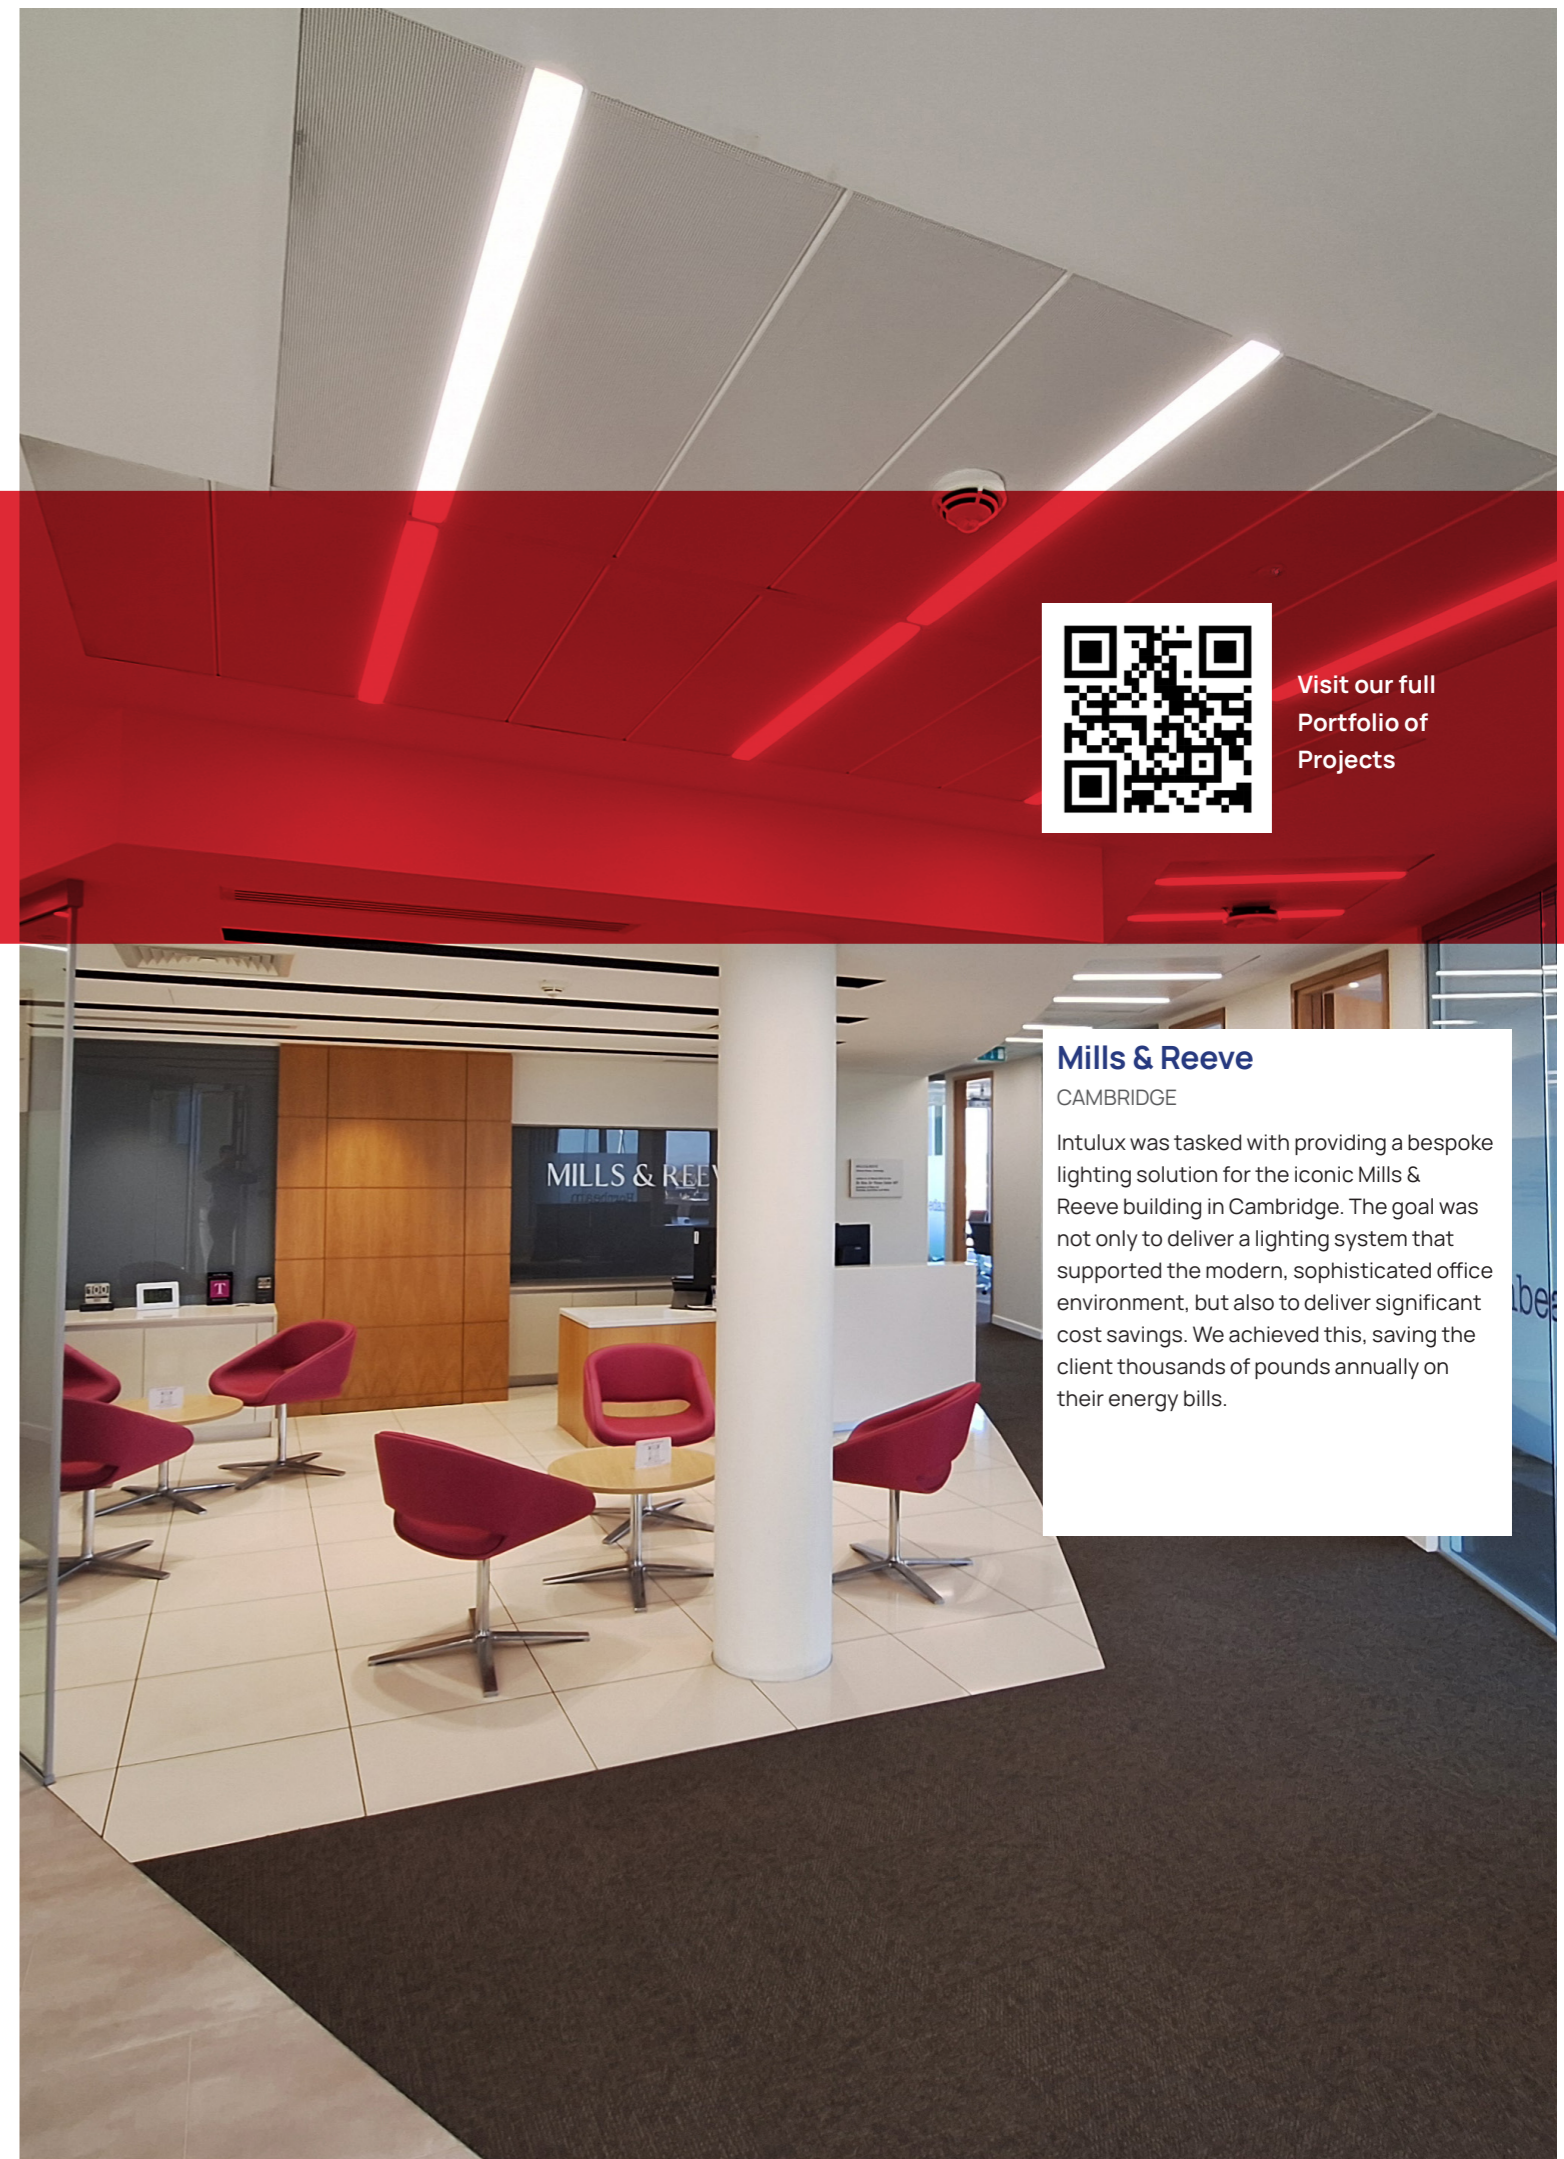

A transformative renovation successfully executed for the distinguished offices nestled within London's EC3 district.

## Movianto HQ

BEDFORDSHIRE

Intulux delivered a comprehensive lighting solution for this 355,914 sq ft headquarters facility in Bedfordshire.

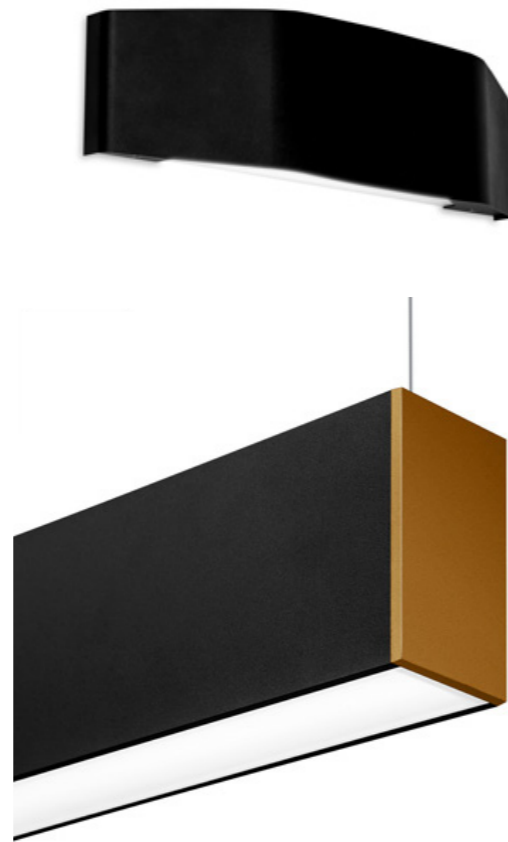

Visit our full Portfolio of Projects

## Mills & Reeve

CAMBRIDGE

Intulux was tasked with providing a bespoke lighting solution for the iconic Mills & Reeve building in Cambridge. The goal was not only to deliver a lighting system that supported the modern, sophisticated office environment, but also to deliver significant cost savings. We achieved this, saving the client thousands of pounds annually on their energy bills.

# BESPOKE PRODUCTS

We understand that every project is unique, so we take a tailored approach to product design that meets your needs for reliability, energy efficiency, performance, and aesthetics.

# DESIGN & MANUFACTURING SERVICES

To make our customers truly stand out, Intulux offers bespoke design and manufacturing services including:

### Laser Cutting

In-house plastic and wood laser cutting for the perfect fit and finish at short notice.

### 3D Printing

Awkward space? Save face. Intulux design and manufacture custom 3D printed fixings and adaptors.

### Custom Assembly

Our final assembly line in South Derby delivers custom products built to your project specifications.

### Body Colour & Finish

Intulux architectural luminaires can be supplied in a wide range of colours and finishes to enhance your vision, not constrain it.

### Commissioning

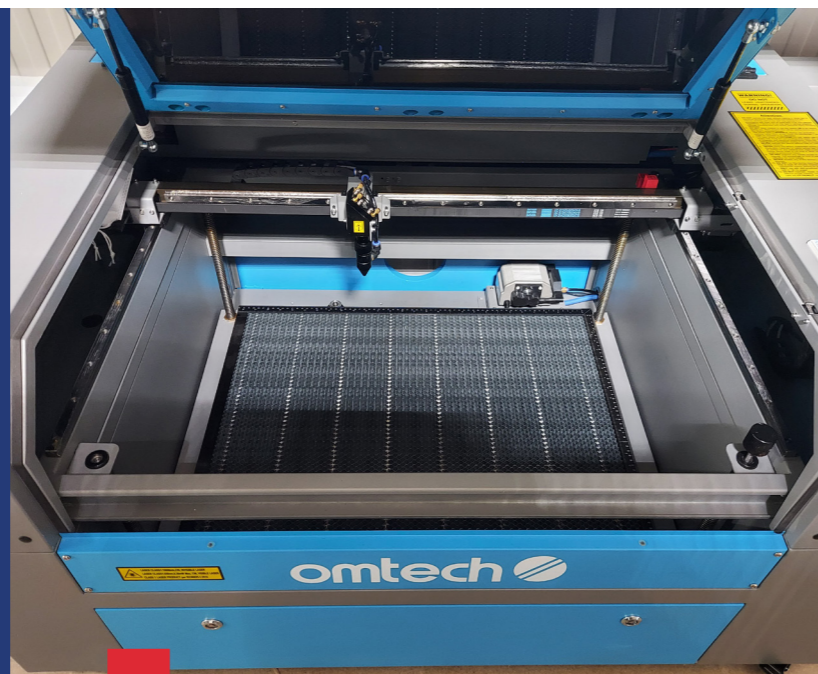

A project isn't finished until it's signed off. Intulux offers an on-site commissioning service to support you right up until those final touches.

### Design-to-Fit

When you really need to impress, let Intulux answer the challenge with bespoke luminaires to fit precisely within your project space.

Our lighting fixtures are engineered to your specifications, with a wide range of customisation options for both appearance and performance.

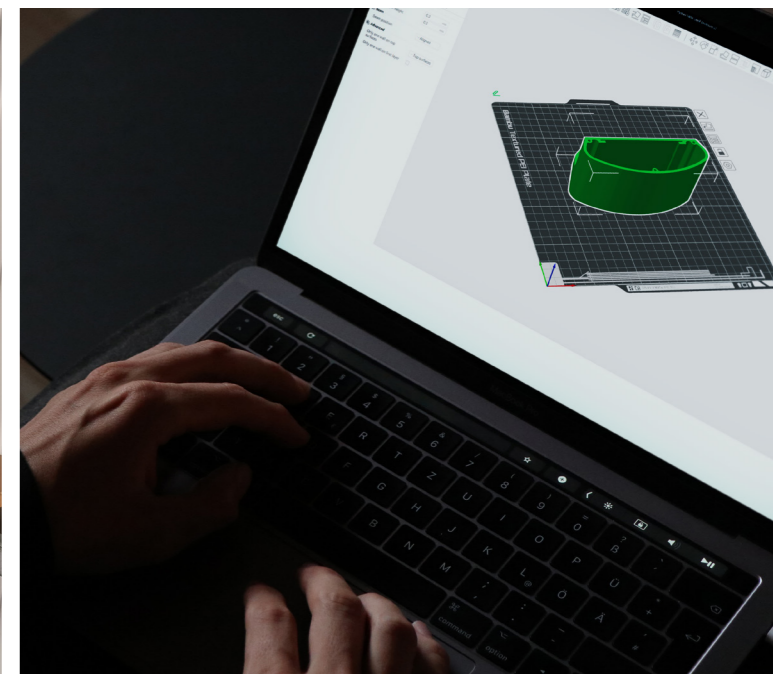

In-house design, manufacturing and assembly puts your vision into your hands.

# CONNECTED FOR EFFICIENCY

Lighting controls are a core part of our design services, providing flexible, energy-efficient solutions. We work with established industry leaders to tailor each controls scheme as carefully as we tailor your lighting.

## Maximising Efficiency and Savings

By adjusting light levels based on needs, lighting controls significantly reduce energy usage, and help to extend the life of your luminaires.

## Comfort at Your Fingertips

Lighting controls allow precise adjustments to suit the mood and function of a space. Whether for productivity, relaxation, or atmosphere, our systems let users easily create the ideal environment. Customisable settings ensure every space is both functional and comfortable.

## Data in Control

In larger premises, maintaining lighting can be an endless task. Advanced lighting controls ease the workload by monitoring the health of every fixture, informing you of problems as they occur.

Furthermore, manual emergency testing becomes a thing of the past with automated test routines conducted regularly with the results mailed to your

## TAKING CONTROL OF YOUR LIGHTING

Lighting controls are essential for optimising any building's lighting system. At Intulux Lighting, we offer both wired and wireless solutions, giving you the power to manage light output, timing, and groupings directly from your device. These advanced systems help maximise energy efficiency by incorporating features like dimming, motion sensing, and daylight harvesting, reducing energy waste and cutting costs.
